

04/20/26

The beloved hemorrhaged anemones
for 3 violes, commissioned by Vivo Columbus

Mahmoud Darwish

The beloved hemorrhaged anemones,
the purple land glittered with his wounds,
the first of its songs: the blood of love shed by gods,
and the last of its blood...

O people of Canaan celebrate
your land's spring and set yourself afire
like its flowers, O people of Canaan stripped
of your weapons, and become complete!

It's your good luck that you ~~chose~~ chose //
↳ agriculture is a profession.

It's your bad luck that you chose gardens
near god's borders,
where the sword writes clay's tale...

so let the grain spikes be your eternal army,
and let immortality be hunting dogs
in wheat fields,

and let the stags be free
like a pastoral poem...

the beloved hemorrhaged anemones,
and the rocks on the slope yellowed from
prolonged labor contractions,
then turned red,
then water flowed red
in our spring's veins...

The first of our songs is the blood of love
that gods shed,
and the last is the blood shed by iron gods...

vicious bursts of sound and continuous bubbling anxiety
even during moments of supposed repose.

From the perspective of the materiality of musical events, gestures, sonic entities...

↳ what is barriolage??

what are its constituent parameters

1 - motion of bow across strings without changing direction,
↳  or  or  or  or 

2 - requires distribution of harmonic materials across the strings

3 - must (usually?) contain more than 1 string of the array

so if we are assembling materials based on the concatenation of various parameters... how would a barriolage moment be constructed?

Is it a "bowing technique", "harmony", "articulation" etc.

* not articulation because it can be staccato, scratch, accented, legato, flautando...

- kind of a rhythm technique because it requires (usually) ~~an~~ an "even division" rhythm style

- its not a harmony because the bowing is so specific

* barriolage and tremolo fall under the unique category of "special considerations"

Baptize new formal concept "tesuji"?

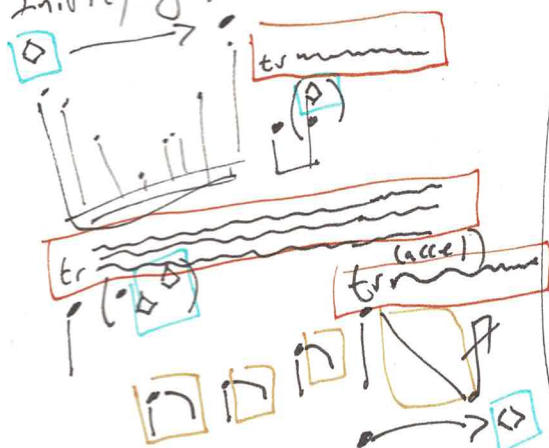

Permutations of 5

$$\begin{array}{l} 91 \text{ bpm} \\ \& \\ 67 \text{ bpm} \end{array} = 39.5 \text{ mm of } \begin{array}{l} 4 \\ 4 \end{array} \quad \begin{array}{l} \text{(rotated x3) fractalized to} \\ 8, 6, 7, 9, 10 \end{array}$$

1.5 minutes

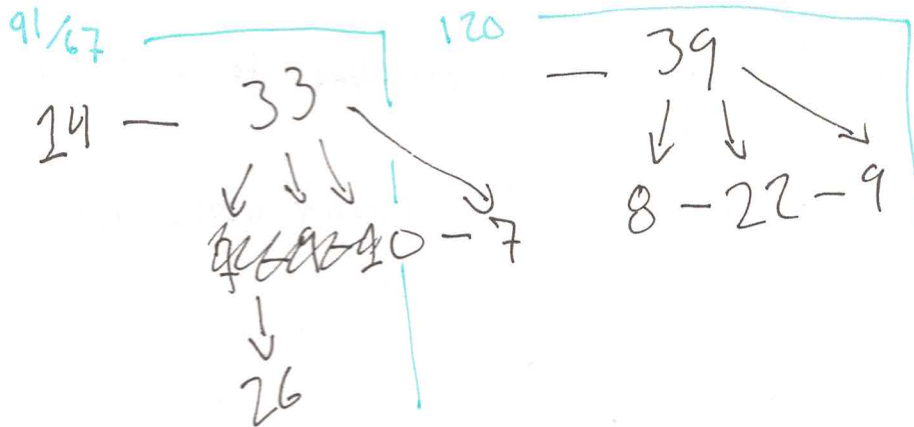

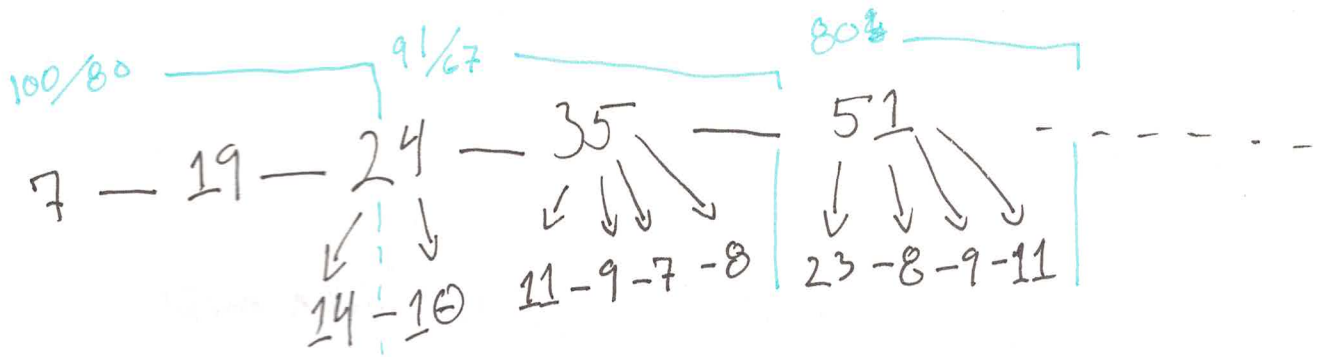

$$120 \text{ bpm} = 45 \text{ mm of } \begin{array}{l} 4 \\ 4 \end{array} \quad \begin{array}{l} \text{(rotated x4) fractalized to} \\ 7, 8, 10, 12, 9 \end{array}$$

100/80 bpm -----, 91/67 bpm -----

7 - 9 + 10 - 8 + 6 + 10 - 11 + 9 + 7 + 8 -

80 bpm -----, 91/67 bpm -----, 120 bpm -----

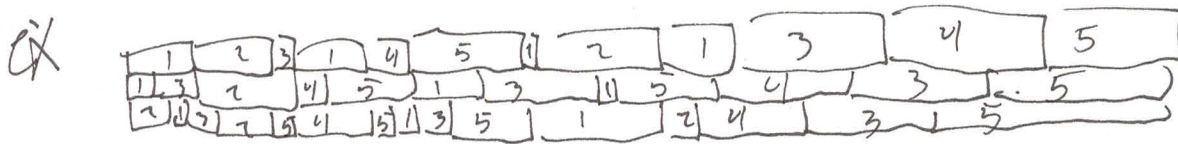

13 + 10 + 8 + 9 + 11 - 8 + 6 - 7 + 9 + 10 + 7 - 8 + 10 + 12 + 9

05/18/26

Segment 1

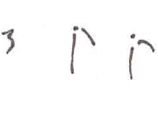

- all $\frac{4}{4}$, preprocess by $\frac{x}{8}$ (i.e. $\frac{1}{8}$) with a markov chain that gradually drifts from smaller divisions to larger divisions
- use microformal material sequence by different voicewise permutations

— assemble constituent material masses by permutation
(compound)

— ~~orchestrations as well?~~

— what lessons were learned when composing music?

- 1  =  is a cool texture
- 2 more dynamic barriolege gestures = 
- 3  can be really dynamic
- 4 interesting repetition varieties can be a pre-dimax
- 5 don't descend into xiarrino imitation

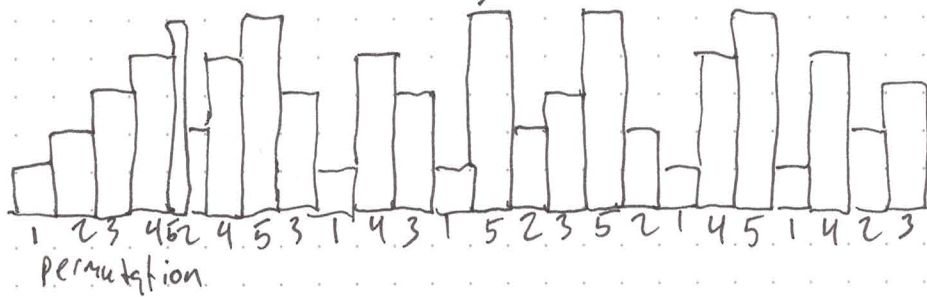

04/04/16 Windflowers (Darwin's Aeneas) for 3 violas

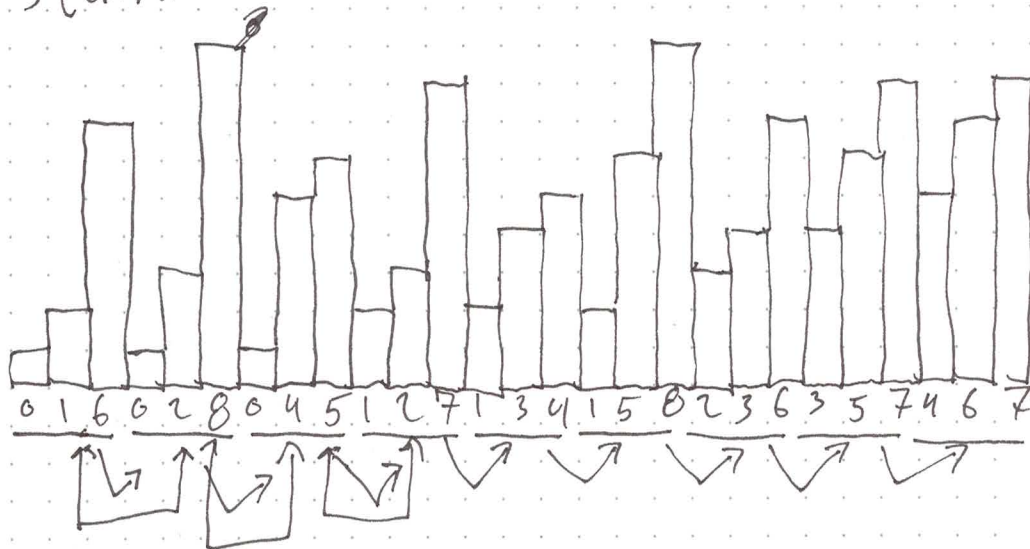

Revive some abandoned Nyctice 3 sketches...

- decoupled cyclic permutation matrices
- lots of flashy gestures and techniques

04/29/26 Aerones

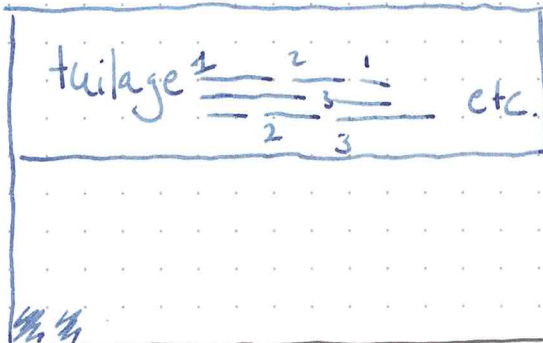

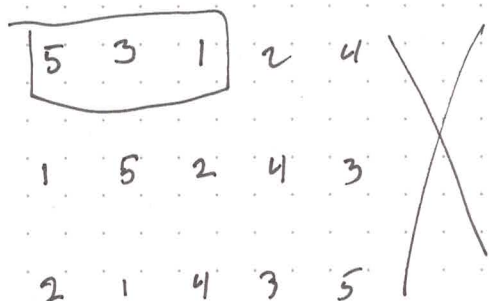

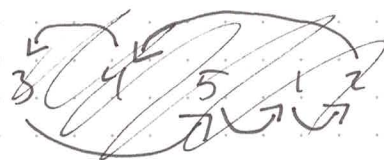

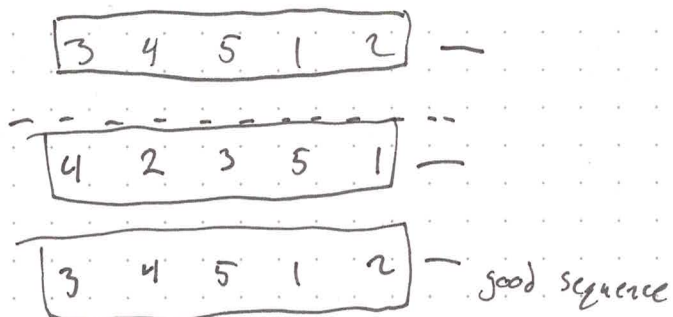

$S(2,3,9)$

602/804/512/713/415/823/635/746

total number of materials per segment

when adding ~~the~~ repeats should I remove some un-repeated measured?
 mostly use $\frac{4}{4}$ but repeats must be something other than $\frac{4}{4}$ ($\frac{7}{8} \frac{9}{8} \frac{5}{4}$ etc...)

01 $\rightarrow$ permuted materials (tailage/overlap) [dense]
 02 $\rightarrow$ structural repetitions (Post Turner get 3 type structures) [sparse]
 04

total number of terms needed in final sequence?

54

add rule like in Wyctive2 where
 a given parameter bleeds into the surrounding material?

material array

Save Pitch for later...
